Packaging Choice and Sustainability

De Luxe™ Packaging, a Novolex® brand, has over 70 years of experience. Our mission is to provide our current customer base and future customers a diverse range of paper and non-paper product lines.

De Luxe™ is primarily involved in food packaging, waxing, foil lamination, pinch bottom bags and industrial wrapping. Since the beginning, we are committed to providing our customers with the highest quality, the best service, and the most flexibility required and expected in today's market.

Due to our experience and leading edge equipment, we are able to process and print a wide variety of large and/or small jobs. Also through expertise and continuous training, we have obtained the SQF certification and are FSC certified.

Choice. Innovation. Sustainability.

Our commitment to sustainability drives us to innovate packaging choices to reduce the impact that Novolex—and our customers and their consumers—have on the environment. This vision comes to life every day through our focus on product development, efficiency and safety in our operations, and partnerships with customers, suppliers, communities and policy makers. By operating our businesses responsibly and investing in our people and communities, we create more opportunities to be responsible corporate citizens. Learn more about our approach to sustainability in the Novolex Sustainability Report, available at www.novolex.com.

Table of Contents

Pan Liners

- 4 Grease Proof

Sandwich Wraps & Basket Liners

Basket Liners

An attractive “Gingham” pattern, waxed, impregnated sheet is used as a basket liner. This adds presentation to your basket of served food.

Performance Features

- Superior grease and moisture resistance
- Economical and functional solution for a broad range of applications
- Has a multitude of applications from liners for Nachos to wrapping hot or cold foods
- Top choice of major quick service restaurants due to high-performance and economic value

ToGo! Hot Meal Bags

The ToGo! Hot Meal Bag is a transformation in packaging design.

The ToGo! Hot Foods bag's innovative ventilation keeps food crispy and flavorful. These bags are portable and easy to take on the go. Loading small, medium or larger birds—and other hot foods—is efficient, saving time and labor. The proprietary material and new heat transfer design keeps food hot in the merchandising case. Our new upscale design with improved window clarity drives impulse purchase and repeat customers.

Zip Seal Pouch Bags

Stand-Up Kraft Zip Seal Pouches
Lock In Freshness

These kraft stand-up style zip seal pouches are heat-sealable and ideal for retailing food items. The clear window highlights your product while the inner bag lamination keeps products fresh.

Performance Features

- Food-grade barrier material protects items from moisture, gas and odor
- Resealable zip closure
- Heat sealable above tear notches for dual seal protection

EcoCraft® Dubl Shield® Insulated Single Serve Bags

Triangle shaped Dubl Shield® adhesive design between the paper layers creates insulating air pockets which keeps food hot and fresh longer than standard single ply sandwich bags and wraps.

300005

300111

300115

Performance Features

- Made from a custom blend of grease and moisture resistant materials for excellent barrier performance.
- Can be custom designed into a standard pinch bottom, Dubl Open® Pocket or pouch style bag.
- We can customize the materials and performance of the bag to fit the specific quality needs of your menu items
- Bag interior has excellent release properties
- Superior heat retention keeps food hot longer than standard one and two ply paper bags
- Wide opening for easy access and high speed loading

Eco Craft® Eco-Flute® Grease Resistant Clamshell Containers

Introducing an EcoCraft® line of Eco-Flute® Grease Resistant Insulated Clamshell Containers constructed with a sturdy light weight micro-flute corrugation. Eco-Flute® balances moisture, resists grease and retains heat and crispness to ensure the quality of the food is maintained. Constructed in various shapes and sizes and with or without windows for a variety of Foodservice, Convenience Store, Supermarket, Concession and Catering applications.

EcoCraft® Eco-Flute® containers are made from 100% unbleached natural fiber which reduces raw material usage by 20% versus white fiber products of similar weight and design. The middle layer of paper (Medium) is made of 100% Post Consumer Recycled paper, further adding to the positive environmental impact. They are also stackable, easy to store, and come pre-assembled.

The Advantages of Eco-Flute® Three Layers

Performance Features:

- Superior rigidity and crush strength
- Thermal insulation to keeps hot food hot and cold food cold
- Lightweight F and E flute material allows moisture vapor transmission to keep foods fresh and crisp, prevents soggy takeout and resists grease
- Easy to load for fast operational efficiency
- Secure latch locking lid functionality
- Side and/or back venting that enables selective release of excess heat and steam from hot foods if needed
- Medium material is 100% Post Consumer Recycled paper
- Window option is great for "Grab N Go" concepts and order accuracy identification

Fresh & Crispy Clamshells

EcoCraft® Fresh & Crispy® Clamshell Containers

FOR OPTIMAL BALANCE OF CRUNCH AND HEAT

Finding the right container to serve or deliver fried foods while maintaining crispiness and temperature has been a challenge. Until now. Introducing the EcoCraft® Fresh & Crispy® line of clamshell containers.

The EcoCraft Fresh & Crispy clamshell containers are an innovative solution in food packaging when maintaining crispiness and heat retention is a priority. Fried foods stay crispy, warm and flavorful due to our high-performance ventilation and breathable paper construction. And, the Eco-Flute® micro-flute corrugation material maintains food integrity due to its superior rigidity and crush strength.

FEATURES AND BENEFITS

- Thermal insulation to keep hot food hot
- Superior rigidity and crush strength
- Secure latch locking lid functionality
- Middle layer of paper (medium) is made of 100% post-consumer recycled content
- Total structure is made with a minimum of 33% post-consumer recycled content
- Custom print available

Lawn & Leaf Bags

Performance Features:

- Bag Dimensions: 16" x 12" x 35"
- 30 Gallon Capacity
- Materials & Construction: Kraft – 2 ply
- Inner and Outer Ply: Kraft, wet strength treated
- Adhesives: Non toxic and moisture resistant
- Available plain, custom print, or stock print
- Custom print: up to 4 colors and 1-4 sides
- Stock Items available in 2 weeks if truckload order (3 weeks for smaller quantities)
- Non-Stock Items are available in 3 weeks after final art approval
- Minimum order of 72,000 for custom print

Available in standard or custom printing

Novo-Dry™ Desiccant Sheet

Dry Air Anywhere

Novo-Dry™ is a new, patented desiccant that delivers higher performance than current desiccants on the market today. Standard desiccants are made from grains or pellets encased in packets. Novo-Dry is efficiently dispersed on a molecular level into a paperboard form, which eliminates the costly process of insertion. Novo-Dry absorbs at least 2 times the humidity of silica gel. Therefore, less desiccant material is required and greater capacity is achieved.

Performance Features

- Made from recycled paper and may be recycled at curbside.
- Eliminates potential safety hazards, spills and mess caused when traditional silica gel or clay packs burst or are opened.
- Effective within a wide temperature range protecting perishable food and fresh produce by controlling relative humidity and providing insulation.
- Controls humidity to prevent rust, corrosion, and mildew on such products as metal parts, furniture, electronics, leather goods and apparel.
- Complies with FDA regulations for direct food contact packaging; 21CFR 176.170 (conditions of use B,C,D,E,F,G,H), 21CFR 176.180, 21CFR 176.260 pulp from reclaimed fiber, 21CFR 109.30a (9) pertaining to PCB content of paper food packaging materials.

Packaging Materials Defined

Tissue

An untreated, lightweight tissue sheet with wet strength used for wrapping hot dogs, cones and foods with low moisture or grease content. Improve the “ease of eating” qualities of burgers by wrapping half the burger in our tissue wrap, then wrap the whole burger in a grease resistant, barrier wax, I-Rap®, insulated paper or foil insulated wrap for superior functionality and food presentation.

Dry Wax

Wax is driven into the paper fibers to produce a material that improves wet strength and moisture resistance. The paper provides good moisture resistance and moderate grease resistance. Our dry wax material is an affordable option for basic deli food wrap or bag applications.

Dubl Wax®

We use two different technologies to create Dubl Wax® paper. Our bags are coated on one side with heavy wax and on the other side with dry wax, which provides a strong moisture and moderate oxygen barrier to keep baked goods fresh longer. Our Dubl Wax® deli papers are aggressively infused with wax to provide a smooth uniform high-performance moisture barrier.

Grease Resistant

A grease resistant coating is applied to this paper to decrease grease penetration and staining. The paper creates a whiter, more opaque printing surface for custom logos or designs compared to dry wax. The paper is very breathable, which keeps wrapped or bagged sandwiches fresher and less soggy by letting steam and moisture escape. This material offers an affordable and functional solution for a variety of food-wrap and single serve bag applications.

I-Rap®

A two-layer insulated paper wrap that combines a layer of grease resistant paper and a layer of absorbent paper bonded together with a honeycomb adhesive design to create air pockets, which provide improved insulation, heat retention and longer holding times. I-Rap® provides heat retention for hot food applications without a wax, foil or poly barrier. The two-ply paper wrap is biodegradable and commercially compostable. Our I-Rap® insulated paper allows moisture and steam to escape naturally, which keeps breads from getting soggy.

Dubl Shield®

Our innovative insulated Dubl-Shield® wrap has a highly functional grease and moisture barrier, but will allow moisture to escape, which keeps your bread or bun from getting soggy and losing freshness. The wrap has superior graphic printability on the flat grease resistant outer layer. Improved sustainable design offers an alternative to foil and poly insulated wraps and it's certified compostable by Cedar Grove, which gives it a clear end of life advantage. Dubl Shield® can be printed on the grease resistant layer with one to four colors and can be produced with tinted adhesive to showcase a message or graphics on the inside of the wrap. Our proprietary triangle design air pockets help keep food hot during the average seven minute holding time, before consumption.

Foil Insulated

Made of foil and paper laminated together to form a multi-functional material for a wide variety of foodservice applications. We laminate the two layers together with a honeycomb-shaped adhesive design. This design creates insulating air pockets between the layers, which improve heat retention and increase holding times. Honeycomb foil insulated wraps and bags provide the best overall heat retention, moisture/grease resistance, holding times, dead-fold and product appearance. De Luxe™ was the first company to manufacture this foil insulated wrap with the honeycomb design, and we continue to be the industry leader in flexible sandwich packaging innovation.

Custom Converting & Printing Capabilities

De Luxe™ offers the broadest range of specialty bag, sheet and roll converting capabilities in the flexible foodservice packaging industry. We manufacture high-quality custom packages on 148 different production lines to provide a wide variety of custom package and print designs. With our efficient, superior F&K presses, we can deliver state-of-the-art graphics capabilities that help differentiate your products on the shelf and on the go. Our long-term commitment to innovation and practical solutions enables us to expertly consult with you on packaging design, process graphics and rigid packaging replacements.

Please review the information we need before you request a quote for a custom product

Provide the individual bag, sheet or roll size

- Bag (width, gusset, length)
- Sheet (width and length)
- Roll (roll width and length or outer diameter)

Initial order quantity needed and the annual volume (units or cases)

Name of printed design or logo

Basis weight of paper if known

Type of paper or combination of materials (foil, bio-film or glassine)

Need a film window?

- Provide an explanation of the proposed window die or panel location on the package

Number of printed colors (provide PMS numbers)

Product application (what will the package be used for?)

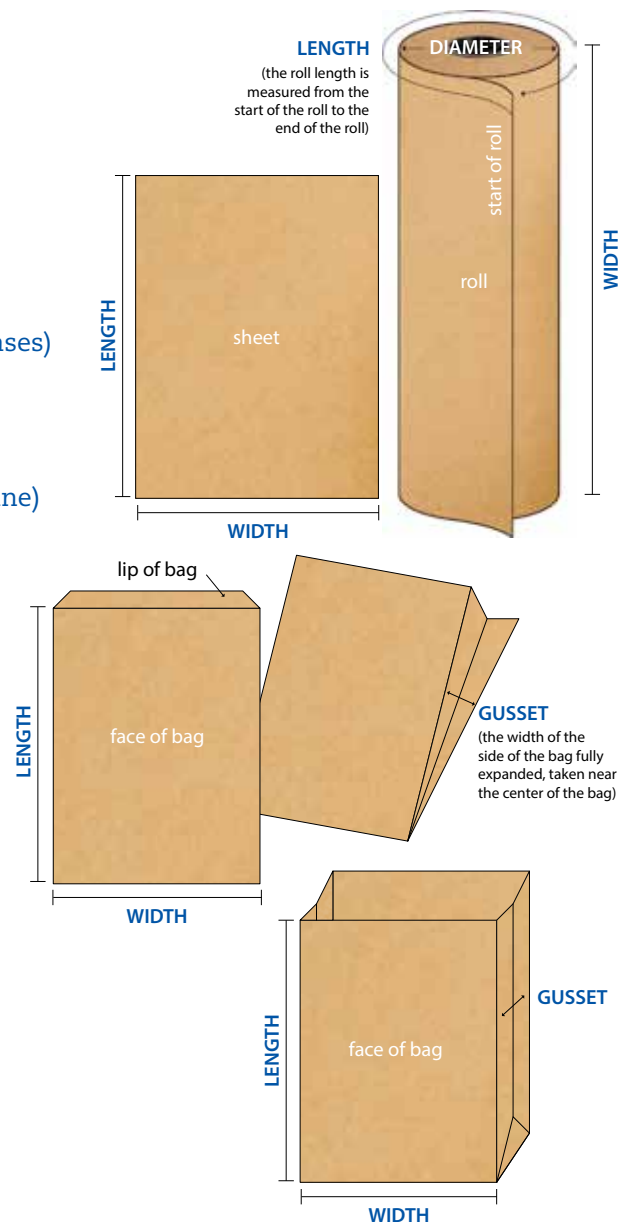

Case pack sizes

Shipping/distribution information

How to measure a bag for quotes and production:

- Measure the face of the bag (width)
- Measure the gusset of the bag (side width)
- Measure the length of the bag (not including lip)

If you have a specific question about our custom or graphics capabilities, please contact novolex.com.
