

Part #: PPA01V100

WATER RESISTANT  
Label and color chart

FRESHNESS MAINTAINED  
Air and water tight bottle

EASY TO READ  
Color blocks

PLASTIC STRIPS  
100 per vial

- Fast, accurate and easy to use!
- Get an accurate reading in under 15 seconds
- Used for testing residual levels of peracetic acid.
- No reagents, chemicals or field kits needed, just one test strip!

NOTE: To test residuals on surfaces: wet the test pad at the end of the strip with deionized water & press against the skin of the fruit, vegetable or poultry in question. If there is any residual peracetic acid present, the color of the test pad will change immediately.

MADE IN USA
