CHIX[®]3000

Compostable Foodservice Towels

Cost-effective, healthier environment, and improved customer satisfaction

Chix 3000 towels from Chicopee[®] are made from bio-based raw materials and are compostable, helping reduce landfill waste. Constructed with a unique open, wavy texture, Chix 3000 enables efficient pick up of soil and liquids in light-duty cleaning tasks. By switching to Chix 3000, you can reduce the amount of garbage you throw out, you can reuse towels for longer, and you can recycle nutrients back into the soil.

Chix 3000 meets DIN EN 13432 2000-12 Standards as tested by an external laboratory and carries the internationally recognized Seedling Logo, granted by DIN-CERTCO.

Chicopee[®] True Confidence[™]
