Diversey has best-in-class cleaning products and dispensing technologies that unlock hidden profits in every convenience store...

...and innovative technologies and products that meet the cleaning needs of your store.

Reduced Costs = Greater Profits

Diversey has created an array of industry leading products ideally suited to the business and cleaning needs of today's convenience store operator. Cost efficient. Simple to use. Proven to perform. These products reduce waste, save space, and eliminate the need for expensive equipment. You save money and boost the bottom line.

Easy to use, so cleaning stays consistent even when employees change

Diversey's innovative dispensing systems operates simply and provides dilution control precision without the need for costly and troublesome wall-mounted equipment. Plus, Diversey backs up this innovative technology with onsite training, food safety certification, customized training materials, and food safety audits.

Reduces shrinkage

When easy-to-use professional, branded cleaning products are available, employees are less likely to use shelf stock for store cleaning needs. Likewise, a bottle of concentrate is a far less attractive theft target than an easily concealed dilutable portion pack.

Reduces cleaning product waste

Diversey's precise dosing technology and no-spill dispensers eliminate profit-robbing cleaning product waste. In addition, our professional strength products get surfaces clean the first time, reducing wasteful repeat cleaning.

Easy to implement

With no equipment to install and simple training steps, your team can implement this program quickly. You can start enjoying greater profitability from more efficient cleaning on the first day.

Eliminates expensive equipment

Diversey's dispensing technology lets you skip the installation expense and maintenance and inspection worries that come with built-in systems.

Saves space

In the concentrated footprint of today's competitive C-store, every cubic inch of space is valuable. Diversey's dispensing technology was engineered with this mind. Lightweight and easy to handle they can be stored on higher or lower shelves than other dispensers.

Better for employees and the environment

Diversey's dispensing technology was engineered with the user and the environment in mind. These products are lightweight, handle easily, and minimize worker contact with concentrated cleaning product. After all, healthy employees contribute to profitability. These products are also fully recyclable and, because concentrated chemicals significantly reduce the amount of plastic in our packaging, our environment benefits from reduced energy and transportation costs.

Plus, Diversey gives C-Store operators value-added programs for more efficient, cost-effective cleaning!

- On-line eLearning system
- Onsite training
- Customized training materials and wall charts
- Food safety processes and certification training
- Sanitation and food safety audits
- Technical support

RTD

Ready-To-Dispense. A revolutionary cleaning system that delivers automatic dilution control in every bottle. All with national brands you know and trust!

- No installation, no servicing, simple water hook-up
- Concentrated formulas deliver low end-use cost
- Sealed containers provide added safety
- Compact system means less space and less waste
- Completely disposable and recyclable
- Available recognized national brands

1. Connect to water 2. Fill spray bottle 3. Go!

INTRODUCING SMART DOSE

The patent-pending SmartDose™ System allows you to easily, safely and accurately dose concentrated cleaning products. This sustainable solution delivers better cost control than any other current dosing system.

Turn the control knob to select the appropriate icon. Pull up on control knob one time to prime the pump. Push the knob down fully to pump a precise dose of concentrate.

Suma OPTIFILL DISPENSING SYSTEM

The Suma Optifill™ 3 Compartment Sink Dispensing System is a maintenance-free manual warewashing program that delivers accurate dosing and dispensing without the need for equipment or permanent water connection.

Optifill has a unique patented pumping system which works by pouring water into the inlet to create motion of the system, which in turn initiates dispensing of the chemical. The mechanism simply starts and stops based on the flow of water. Suma Optifill requires no set up, so it's ready to use straight out of the box each and every time.

	SKU	Pack Size	Dilution Ratio	End-Use Yield/Case
