

# Dry Foam Shampoo & Encapsulation Cleaner

Dry Foam Shampoo & Encapsulation Cleaner is an excellent wetting neutral carpet and upholstery detergent that also encapsulates soils to dry and vacuumed out.

## Features & Benefits

- Powerful detergents and solvents encapsulate and strip soils from carpet fiber
- Versatile formula safe for use across all soil levels and on most carpets, including wool
- Leaves no tacky residue, which can lead to resoiling, and dries to a clear powder
- Product is free of alkalis and soap

## Applications

- For use cleaning and conventional shampooing of carpets
- Designed to work in conjunction with:
  - TASKI Dry Foam System
  - TASKI procarpet 30
  - TASKI procarpet 45

# Dry Foam Shampoo & Encapsulation Cleaner

## Use Instructions

- Blockade area to be cleaned. Surrounding areas without carpet could become wet and slippery.

### For Dry Foam Cleaning

- Vacuum carpet thoroughly and remove debris
- Fill Foam Generator with use solution of Dry Foam Shampoo & Encapsulation Cleaner diluted 10 oz. per gal. (80 mL / L) with water
- For light soils, adjust foam to setting -2- on Foam Generator. Run foam for 10 seconds to allow foam to build up in brush without spinning. Clean carpets using foam.
- Allow carpets to dry for 30 minutes
- When carpet is completely dry, vacuum to remove crystallized soil
- For heavier soils, adjust foam to setting -4- on Foam Generator. Run foam for 10 seconds to allow foam to build up in brush without spinning. Clean carpets using foam.
- Allow carpets to dry for 35–45 minutes
- When carpet is completely dry, vacuum to remove crystallized soil

### For Conventional Shampooing

- Brush-up compressed carpet pile of high traffic areas then vacuum to thoroughly eliminate surface soil.
- Depending upon soil level, dilute 4–10 oz. of Dry Foam Shampoo & Encapsulation Cleaner per gal. (30–80 ml/L) of water
- Application: Shampoo by hand, with a soft brush, the borders and other places inaccessible with carpet machinery.
- Using appropriate carpet cleaning machine, treat carpet evenly. Brush-up carpet pile while still moist.
- When carpet is completely dry, vacuum to remove crystallized soil.

**NOTE:** DO NOT SOAK CARPET. COVER FEET OF FURNITURE WITH PLASTIC OR ALUMINUM FOIL.

### For Encapsulation Cleaning

- Vacuum carpet thoroughly and remove debris
- Dilute Dry Foam Shampoo & Encapsulation Cleaner product to an 8% solution or at 1:13 (100 mL per L) with water
- Put solution in an Encapsulation Cleaner
- Operate the machine according to the manufacturer's recommendation
- Immediately begin to walk backwards at a slow walking speed, pulling the machine over the carpet
- Overlap slightly with each pass
- Allow carpet to dry, then vacuum (vacuuming can be performed at the next scheduled vacuuming)
