

Full Line Catalog

MAY 2023

We are a global leader in foodservice packaging made from renewable and recycled materials.

We work to improve composting and recycling infrastructure, and collaborate to shift how the world manages resources.

We deliver benefits to our partners that are unavailable anywhere else in the market.

Certified

This company meets the highest standards of social and environmental impact

Corporation

The Eco-Products Difference

PRODUCTS

Broad assortment of more than 450 stock items

Third-party certifications and field testing to support environmental claims

Personalization and custom product development

INNOVATION

Award-winning product design team & cutting-edge product development

Vanguard® molded fiber with no added PFAS

Expert staff to help with sustainability goals, waste diversion, and compliance

SERVICES

Marketing and communication tools and support

Custom life cycle analysis reports

Product customization

Sustainability and Zero Waste advisory

ADVOCACY

Committed to solving the world's waste problem and supporting a more circular economy

Leading industry efforts to increase composting and recycling

Thought leaders on Sustainability and Waste Diverting Systems

Eco-Products

100% renewable - BPI certified

Our Vision

Eco-Products will be in the vanguard of our Zero Waste future.

Our Mission

At Eco-Products, we understand the connection between the health of the planet and the impacts of disposable packaging. Every day we work to advance Zero Waste systems, and help our customers be better stewards of the environment.

Our Manifesto

At Eco-Products, we believe waste can be a wonderful thing.
A bottle can be recycled into a BlueStripe™ cup.
An unfinished meal to-go can nourish our soils.
A take-out container with food scraps be sent to the compost.
It sounds hard, but it's our job to figure it out.

We obsess over things like composting, recycling and a product's life cycle.
We put specialists in the field to work with local communities to expand access to commercial composting and recycling.
We seek out opportunities in our everyday operations to curtail environmental impacts.
Because we believe there's purpose in our plates.
There's consciousness in our cups.
There's potential in your humble food scraps.

We're all partners in the regeneration of the planet.
And what feels simple, like drinking from a cup or tossing food into the compost bin with a fork can make big changes in the world.

You don't need to be an expert to understand.
Together we can turn the end of the meal into a planet of possibilities.
We can put waste to work.
That's not a mouthful. That's a movement.
That's Eco-Products.

#PutWasteToWork

Our Two Product Lines

Made with renewable resources, Compostable*

PLA

Poly-lactic acid is plastic made from starchy plants, like corn or sugar. It looks and feels like traditional plastic, but is compostable.

MOLDED FIBER

Sugarcane, bamboo, wheat and other plant fibers are rapidly renewable resources that can be pulped and molded into a variety of shapes. The end products are sturdy and compostable.

PHA

Bioplastic derived from canola oil.

PBAT

Compostable plastic.

BlueStripe®

Made with post-consumer recycled content

RPET

Polyethylene terephthalate (PET) is commonly used in soda and water bottles

RPS

Polystyrene (PS) is found in products such as CD cases and plastic hangers

PCF

Used paper reduces the demand for virgin paper.

What do we mean when we say a product is “compostable”?

To us, something is “compostable” if there is scientific evidence that the product will break down or become part of stable compost in a safe and timely manner, in a properly managed commercial composting facility.

(If that language looks familiar, it’s because we basically lifted copy from the Federal Trade Commission’s Green Guides.)

What counts as scientific evidence?

FIELD TESTING FOR COMPOSTABLE PRODUCTS

We submit all of our BPI-certified items to the Compost Manufacturing Alliance (CMA) for field testing.

The CMA is a nationwide partnership of compost manufacturing facilities providing field disintegration testing for foodservice products across the country. CMA's mission is to make compost manufacturing more sustainable by working proactively to field-test compostable products in real-world compost processing technologies. We were one of the first supporters of CMA as we see value in having composters test and confirm that our products break down successfully at their facilities. This is a valuable complement to the lab-based BPI certification, which we have long used as third-party validation of compostability.

Composting Technologies:

CMA-W

(Windrow Technology)

CMA-I

(Covered In-Vessel)

CMA-MSAP

(Modified Static Aerated Pile)

CMA-TA

(Tunnel)

CMA-S

(Substrate Acceptance)

PRODUCTS

COMMERCIALLY COMPOSTABLE ONLY
COMPOSTAGE COMMERCIAL FACILITY

Vanguard™ Molded Fiber

Our Vanguard® offering is a groundbreaking and award-winning line of molded fiber plates and containers using proprietary alternative compounds to achieve grease-resistance performance without relying on added PFAS*. Vanguard® demonstrates our continued commitment to choice and innovation in foodservice packaging. We currently offer 83 Vanguard SKUs - look for them throughout this catalog.

- » Made from sugarcane
- » Microwaveable and freezable
- » Hot and cold food friendly
- » Grease- and cut-resistant
- » Proprietary alternative compounds to achieve grease-resistance performance
- » BPI-certified compostable
- » Patents pending on the new formula

No PFAS Added

Per- and polyfluoroalkyl substances (PFAS) are a class of synthetic chemicals used in many products to impart water- and grease-resistant properties. Vanguard® uses alternative FDA-approved chemistries to achieve similar performance without the use of added PFAS. Patents pending on the new formula.

BPI Certified Compostable

Biodegradable Products Institute (BPI) is a third-party organization that provides certification for materials and products that break down in a commercial composting environment. "BPI Certified" means a product has gone through a rigorous testing process for compostability.

GreenScreen Certified™ Silver

Developed by Clean Production Action (CPA) and the Center for Environmental Health (CEH), GreenScreen Certified is an independent, non-profit certification standard that promotes the use of preferred chemicals in products and manufacturing. Silver certification prohibits the use of chemicals in the Restricted Substances List (RSL) - including PFAS - set within each product category plus thousands of chemicals listed on globally recognized chemical hazard lists. Every chemical used in the Vanguard® formulation went through evaluation. This certification attests that the product does not contain known chemicals of high concern to human health and the environment.

*Per- and polyfluoroalkyl substances

Hot Cups

Our GreenStripe® design may have morphed over the years, but what it stands for has not. When we started making foodservice products way back in 2007, our GreenStripe® hot and cold cups were a renewable and compostable alternative to conventional cup choices, and the same is true today. Trusted by composters and customers alike, you can't go wrong with GreenStripe® or any of our other hot cup prints.

- » Made from renewable resources
- » Lined with PLA, a plant-based plastic
- » Meet ASTM standards for compostability
- » BPI-certified compostable

Paper Food Containers

These may look just like your everyday paper food containers, but they are oh so much more. Made entirely from materials that can be grown again and again, these cups fit into your life easily and without excess waste. Compostable, renewable, good looking, and functional. You couldn't ask for a better fit.

- » Made from renewable resources
- » Lined with PLA b'oplastic, a plant-based plastic
- » Meet ASTM standards for compostability
- » BPI-certified compostable

GreenStripe® Cold Cups

This is not your (virgin plastic, non-compostable, non-recyclable) red party cup. This is the one and only GreenStripe® renewable and compostable Cold Cup! This cup holds drinks without leaking, rocks its environmental attributes, and is always the life of the party. Best of all, when it's time to go home, this cup is 100% certified compostable and returns to the soil...until your next bash.

- » Dome, flat, and sip lids
- » Made from renewable resources
- » Made with PLA b'oplastic, a plant-based plastic
- » Meet ASTM standards for compostability
- » BPI-certified compostable

Straws

Need straws? We got 'em! We offer all kinds of options for lengths, diameters, and wrappers. Our PLA and Paper Straws are compliant with many straw bans around the U.S. Not sure what's allowed in your area? We stay on top of legislation like that, so we can help you find the info. Reach out to your Sales Rep or Operator Specialist to discuss.

- » Made with PLA b'oplastic, a plant-based plastic, or paper
- » PLA straws meet ASTM standards for compostability and are BPI-certified compostable

Clear Grab & Go Containers

Life is all about choices, and isn't it a wonderful feeling to stand in front of a display case of beautifully arranged food in colorful stacks to choose what to eat for lunch? Say no to the waste that comes with old-school containers and reach for something different. Fill your fridge with these attractive and environmentally preferable clear containers. Your customers will grab, go, and even better, come back again for seconds. They're clearly a better choice.

WorldView™

Our WorldView™ Containers combine sugarcane bases with RPET or PLA lids for maximum strength and optimum presentation. Renewable and compostable PLA lids are perfect for cold foods, while the 100% recycled content lids work equally well for hot or cold dishes.

- » Available in a variety of shapes and sizes
- » Bases made from renewable and reclaimed sugarcane fiber
- » Lids made with PLA bioplastic or 100% post-consumer RPET
- » Bases and PLA lids meet ASTM standards for compostability
- » Bases and RPET lids are hot-food friendly
- » Some sizes available in Vanguard™ - No PFAS intentionally added

Sugarcane Bowls

Just say yes to sugarcane! Also known as bagasse, this reclaimed fiber is strong, sturdy, renewable, and compostable. A multitude of sizes and shapes make our bowls suited for the tiniest side portion to an individual serving, all the way up to a family style entrée.

- » Made from renewable and reclaimed sugarcane fiber
- » Three shapes and many sizes to choose from
- » Select sizes available in white or natural color
- » Meet ASTM standards for compostability
- » For use with hot or cold foods
- » Grease- and cut-resistant
- » Microwaveable and freezable
- » Some sizes available in Vanguard™ - No PFAS intentionally added

Folia™ One-Piece Containers

We designed our patented Folia™ line to completely redefine the take-out and leftover experience. Innovative features include tear-away flaps for easier access to food, leak-resistant side flaps that prevent spills and hold condiments and cutlery, and a full array of shapes and sizes that satisfy a broad scope of foodservice needs. It's also the recipient of the "2013 Package of the Year" award from QSR Magazine and the Foodservice Packaging Institute, as well as the "iF Packaging Design Award 2014 - Gold."

- » Made from natural molded fiber like sugarcane and bamboo
- » Meet ASTM standards for compostability
- » For use with hot or cold foods
- » Microwaveable and freezable
- » Embossed to show off handy features like pull tabs, perforated flaps, cutlery nooks, and sauce caddies
- » Molded, spill-resistant corner flaps
- » Engineered stackability
- » Vanguard™ - No PFAS intentionally added

Embossed tops and debossed bottoms nest for stable stacking

Cutlerease™ Dispensing System

Clean, Hygienic Cutlery

- » The innovative Cutlerease system dispenses clean cutlery one piece at a time.
- » Tape tabs offer easy pick up and loading of cutlery into cartridge without having to touch any part of the cutlery.
- » Handle-first delivery ensures guests touch only the handle of the cutlery they are taking.
- » No trays or levers; helps prevent accumulation and transfer of germs and bacteria.
- » Space Savings
- » Compact footprint: <1 ft² for 3:1 space savings over the other guys.
- » Efficient Dispensing
- » Customers can take only what is needed.
- » Cutlerease automatically dispenses one piece of cutlery at a time.
- » Guests simply pull on the handle of the piece they want, and the next piece pops out ready for the next person.
- » Convenient & Easy to Use
- » Customize your cutlery options. Cutlerease is so versatile, you can mix and match cutlery to meet the needs of your business. Need more spoons than forks? No problem.
- » Zero Waste Programs
- » Eco-Products Cutlerease cutlery is BPI-certified compostable, so it's compatible with Zero Waste Systems.

Cover all your catering needs with our classic trays, bowls, and serving utensils. Sugarcane bases and clear lids provide performance, presentation, and sustainability benefits that can't be beat.

- » Made from renewable and reclaimed sugarcane fiber
- » PLA lids and serving spoon are BPI-certified compostable
- » Bases and sugarcane spoon/spatula meet ASTM standards for compostability

Regalia™ Half Pans

Ready to party? We are! You can't beat the convenience of drop-off catering, especially when it involves guilt-free single-use servingware. Mix and match our Half Pans with one, two, or four compartments to serve a whole smörgåsbord of hot and cold foods. Pack it up, drop it off, and then be done. Our newest PLA-lined versions even feature a locking tab closure for extra lid-fit insurance in transit.

- » Available in three compartment configurations with a common lid
- » Made from renewable and reclaimed sugarcane fiber
- » Meet ASTM standards for compostability
- » PLA-lined Half Pans feature tab/slot locking system
