Fresh Fusion Metered Aerosols

Naturally better smelling fragrances. Fusing the science of metered aerosols, natural oils and superior fragrances so our fragrances simply smell better without a harsh chemical overtone. Eliminates odors using the very best science has to offer we blended Fusion with a patented odor neutralizer, Ordenone™ that encapsulates malodor molecules and eliminates odors at the source. 3,200 sprays lasts for 30 days and can deodorize a room up to 6,000 cubic feet. Smells stronger/longer. Fusion's smaller particle size will float in the air longer so you smell it longer. No messy build up on surfaces. VOC compliant.

**Fresh Easy Fresh Room Air Fresheners**

Easy Fresh is the world's only air freshener dispenser that uses the fragranced cover of the dispenser as the air freshener refill itself! Now, instead of unlocking a dispenser, unloading the old refill, loading the new refill and replacing the cover, you just take off the old cover/refill and replace it with a fresh one!! Each cover is composed of a unique material containing twice as much fragrance as most other air fresheners which is released over 30 days.

**Fresh Easy Fresh® 2.0 Cover w/Batteries**

Powerful enough to freshen even your largest spaces, Easy Fresh is the worlds only air freshener dispenser that uses the fragranced cover of the dispenser as the air freshener refill itself! Now you can save yourself time and energy with a product that makes replacement easy. The Easy Fresh fragranced cover is composed of a unique material containing 2-3 times more fragrance than gels or metered aerosols. The motor-driven fan moves fragrance further than a typical passive system, thus freshening larger areas. The smart system behind the Easy Fresh releases approximately the same amount of air freshener daily over 30 days by turning the fan sparingly in week 1, and gradually turning it more frequently until week 4 when the fan runs constantly. The smart dispenser comes with a light that alerts you to change your cover after 30 days, and begins counting down another 30 days once you change the cover!

Strongman Coreless Roll Can Liners

Made with a combination of LLDPE and LD resins. LLDPE has a high tensile strength and high impact, chemical resistance and puncture resistance. LD is the most common plastic used to make can liners, as it is soft and flexible. By blending it with LLDPE, strength increases without losing the thinner mil weights and flexibility. Has a star-seal bottom. Perforated coreless roll.

**Elkay® TUF-R® Linear Low Density Gusset Bags**

Tuf-R® Linear Low Density Polyethylene (LLDPE) bags provide extra strength and puncture resistance compared to low density bags of the same gauge. Because of this, it's often possible to use a lighter gauge Tuf-R® bag to do the job of a heavier gauge LDPE bag, which saves money and helps to reduce the environmental impact. Tuf-R® bags are made from virgin materials, so they comply with USDA and FDA requirements for use in food applications.

Dart® Foam Hinged Lid Containers

Hinged containers available non-perforated or with the PERFormer™ perforated hinge that allows the container's lid to be removed. Stackable. Secure closure. Has high insulation properties to keep hot food hot and cold foods cold. The vented container comes with the PERFormer™ perforated hinge. Vent holes on sidewalls of the lid preserve food quality (i.e. crispiness) by allowing steam to escape. These containers feature either a double lock closure or a "knuckle" locking tab intended to prevent accidental openings. When closed, a perimeter seal keeps food secure, reducing leaks. Tabs on base ensure container stay closed when picked up by the lid. Also available in black.

--------------	--------

Pactiv EarthChoice™ SmartLock® Hinged Lid Containers

EarthChoice™ SmartLock® hinged lid containers are made from Talc-Filled Polypropylene which contains on average 40% less plastic polymers than standard polypropylene containers. This hybrid material is microwaveable up to 250° degrees F (121° C) and is ideal for your hot food take-out menu items. The textured sidewalls provide secure handling. The soak through resistance resists grease, moisture and helps to eliminate messy leaking.

International Paper ecotainer™ Hot Cups

The ecotainer™ hot cup provides a more environmentally sensitive alternative to traditional disposables. Sourced from fully renewable resources, these cups use a corn-based plastic as a moisture barrier rather than a petro-chemical. This PLA-based coating also makes the cup compostable in municipal and commercial composting facilities. Your customers's won't be able to tell a difference, but the environment will.

Plastic Heavy Weight Cutlery

EMI Yoshi GlimmerWare™ Cutlery

A simple and sophisticated style. Ideal for formal or casual dining. Adds a realistic look to any table setting. Mirrors the illusion of premium flatware. Generously sized making them comparable to European cutlery used in the finest restaurants and hotels. We round our fork tines and the bowls of our spoons are deep and smooth around the edges. Our knife blades are finely serrated to easily cut through most foods. Our handles are balanced to the utensil and the unique arch of our handle feels more natural in the hand. And, our sidewalls are thick and durable which adds strength to every utensil.
