## Expert Tips - How Professionals Scrape

- Check if glass is scratch-resistant and suitable for scraper use  
*Unsuitable glass surfaces include: plexiglass, crown glass, solar glass, and safety glass (ESG)*
- Always follow the manufacturer's instructions
- Perform a scrape test in advance on a small section
- Before starting, check the glass for any damage and report it, if necessary
- Check the blade for damage and change or reverse it
- The surface to be scraped should always be wet
- It is best to use a releasing agent, such as EasyGlide Glass Cleaner
- Scrape in one direction. Never pull the scraper back, as this may cause scratches
