MAKING A DIFFERENCE ONE CUP AT A TIME.®

Graphic Packaging International's ecotainer® packaging products are sourced from fully renewable resources. The fiber comes from responsibly managed US forests through a procurement system that meets Sustainable Forestry Initiative® (SFI®) Certified Sourcing standards, while the cup coating and lids use PLA biopolymer, a naturally advanced plant-based material. This combination makes ecotainer a fully compostable package in commercial composting facilities*, which can reduce the amount of waste going to landfills.

The ecotainer product line includes cold cups and lids, hot cups and lids, Cup Buddy® sleeves, and food containers and lids. All products are available in a variety of sizes and can be customized to enhance your brand.

You can feel good about doing business with Graphic Packaging International knowing we offer the security of supply, innovation and quality you deserve. We have partnered with leading industry organizations like the Foodservice Packaging Institute's Paper Recovery Alliance and the US Composting Council to advance the recovery rates of our products.

ecotainer products hold the promise of a more sustainable future. And that's not just great for the planet, it's great for business.

*Composting facilities may not exist in your area. Visit findacomposter.com to find a facility.
