# HOW TO USE 8-SIDED FOLDS with Microfiber Cloths

**NOTES:** Color-coding can prevent cross-contamination, so assign each color of cloth to a specific area and task. Do not over-saturate cloths. Follow all established safety procedures. Don all appropriate Personal Protective Equipment (PPE).

**1.** Begin with an open, clean microfiber cloth.

**2.** Fold your microfiber cloth in half.

**3.** Fold microfiber cloth in quarters, resulting in a square-shaped pad with four layers of cloth.

**4.** Clean surfaces with the two exposed sides of the microfiber cloth. Track the side used for each surface while cleaning.

**5.** Open microfiber cloth once to change sides.

**6.** Refold to expose two fresh cleaning surfaces. Track the side used for each surface while cleaning.

**7.** Open the cloth fully once four surfaces have been used and expose four fresh surfaces.

**8.** Repeat steps 2 through 7 to use all eight sides.

# BE NOTICED!

The average cost per slip-and-fall accident is \$22,000, totaling around \$70 billion each year. Businesses can reduce slip-and-fall accidents by promoting safety and using proper equipment. In a comprehensive study of Banana Products™ wet floor cones vs traditional wet floor signs, 88% of participants noticed the “Banana Cone”, versus 7% noticing the “Floor Sign”. This study concludes that pre-existing knowledge of the banana peel slip reference is the root cause for “Banana Cone” to significantly outperform all other products in tests for safety perception<sup>(1)</sup>
