

LK® Vacuum Pouches

Vacuum Pouches provide an excellent means of keeping foods fresh and protecting against freezer burn. Foods such as cheese, meat, fish, nuts, dried fruit, jerky and snack products retain their freshness much longer thanks to the excellent sealing properties and oxygen transfer rates of LK vacuum pouches. In addition, vacuum sealing can provide outstanding protection to non-food products. Vacuum packaging can be used to reduce static electricity for electronics packaging, maintain sterility in medical packaging, and protect products from corrosion.

Laminated Poly-Nylon Vacuum Pouches

- Made from three layers of polyethylene, nylon and linear low density resins
- Tough 3-mil thickness
- Outstanding vapor and oxygen transmission properties
- High clarity and impact resistance
- Freezable and boilable

Co-Extruded Vacuum Pouches

- Cost-effective three-mil thick mixture of polyethylene and nylon resins
- Three mil thickness
- Conforms well to irregular product shapes
- Excellent vapor and oxygen transmission properties
- Available in clear or with black back
