

Ill-fitting and oversized liner bags just don't stand up to the job.

■ SCENSIBLES® LINER BAGS

The Problem

Research has proven that the #1 contaminated fixture in a restroom is the menstrual waste receptacle. All blood, including menstrual blood, carries the risk of blood-borne pathogens such as Hepatitis, which can survive even on a dry surface for several days and still be infectious. OSHA Blood-borne Pathogen Standard expects that menstrual care products be discarded into waste receptacles that are properly lined to prevent contact with the contents.

These lidded receptacles are a perfect environment for odor-causing bacterial growth. Commonly used inexpensive waxed paper bags and oversized plastic bags do not hold their form to contain waste. The result is an offensive smelly mess and a health hazard for restroom patrons and cleaning staff.

The Solution: Scensibles Universal Poly Liner Bags

The new and improved high density polyethylene material provides a formed and snug fit. The 12 micron thickness adds maximum strength and performance. Frosted to mask contents yet still allows cleaning staff to see and avoid potential needles and other sharps. Environmentally Friendly - sends up to 50% less material weight to landfills than kraft waxed paper bag liners.

- Custom-sized to correctly fit most common menstrual waste receptacles
- Strong and flexible to conform to the receptacle and conceal contents
- Frosted bags allow cleaning staff to see and avoid potential needles and other sharps
- Completely encloses discarded products to reduce risk of exposure to possible blood-borne pathogens

Sanitary

- Leak proof
- Built-in antimicrobial inhibits the growth of odor causing bacteria on the bag
- Pleasant fresh fragrance masks odors
- Snug fit prevents bag collapse
- Keeps receptacle clean and appealing
- Encourages disposal in the receptacle, not down the toilet

Market Segments

Scensibles liners are a proven solution for all public restrooms. Ideal for high traffic restrooms such as airports, arenas, schools, amusement parks, and more.

**Scensibles®
SecureFit360® Liner Bag**

**Scensibles®
Medium Liner Bag**
LBM500HD

Liners cover the inside surface to completely contain waste.

The 7.5 inch **wraparound strap** is used as a handle to eliminate the need to reach into receptacles to remove the liner with the contents.

Plastic SecureFit360® liner bags are custom designed with a unique strap that wraps around bottom of receptacle to secure in place and contain waste for safe removal.

Item #	Description	Size	Color	Selling Unit	Case Pack
LBS500HD	Small Liner Bags	9.5" x 3.5" x 12"	Frosted Clear	1 cs	500/cs
LBM500HD	Medium Liner Bags	10" x 4" x 12"	Frosted Clear	1 cs	500/cs
LBSF500HD	SecureFit360® Liner Bags	12.5" x 23" with 7.5" strap	Frosted Clear	1 cs	500/cs

Universal Scensibles® Liner Bag Reference Guide

LBS500HD

Tight-fitting open-end bag designed for Scensibles® CDW and HOSPECO HS-6140WP receptacles.

HOSPECO

CDW, CDB,
HS-6140WP

LBM500HD

Flexible open-end bag designed for stall partition recessed and dual-access receptacles with removable molded polyethylene liner, and rigid removable liner of white plastic receptacles. LBM500HD can also be used on wall-mount receptacles when folded over properly.
