CUSTOMIZATION

... IT'S NEVER BEEN EASIER!

PROMOTE YOUR BUSINESS WITH ATTRACTIVE CUSTOM GRAPHICS

More than just holding your delicious food, your packaging can help drive additional revenue, build customer loyalty and ensure happy, returning customers.

We offer custom printing on almost all of our products. Print your name, logo, design or color on our products to make them your own.
Marketing your brand has never been easier!

CREATE IMPACTFUL MESSAGES FOR CUSTOMER CONNECTION

1. **Customer Convenience:** Offer your customers more convenience - Print a bar code for customers to download an online ordering app.

2. **Interactive:** Entertain your customers while they eat - Print a link to an augmented reality app that makes your package "come to life".

3. **Cross Promotion:** Offset packaging cost by sharing the message with one of your favorite suppliers

4. **Loyalty Programs:** Print a code that allows your customers to sign up for rewards like points towards coupons and discounts.

See our Custom Print Program brochure with details for custom color printing on trays, ChampPaks™ and lock corner bakery boxes, all with LOW MINIMUMS!

SUSTAINABILITY

SCTRAY.COM
GREEN INITIATIVE
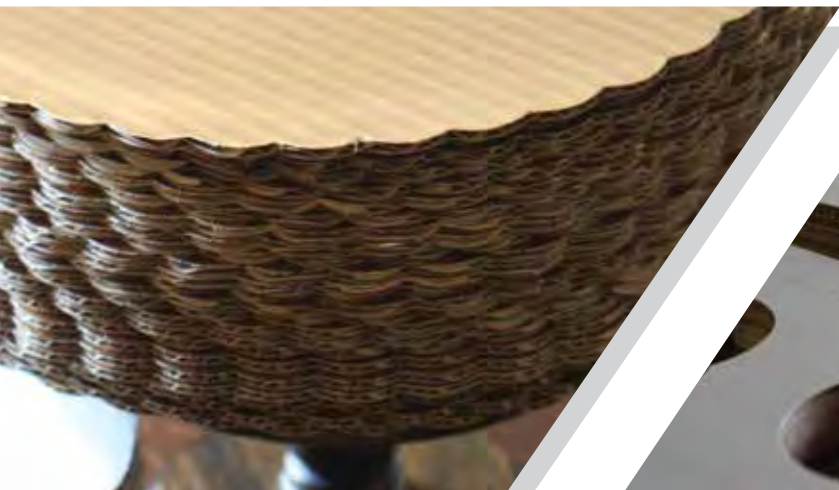

Look for our sustainability icons on each product page.

Our Green Initiative:

Our products are made from paperboard, which is recyclable. Many of our products are compostable in municipal composting facilities. Our goal is to encourage sustainable outcomes for our products. We are continually working to improve our products' environmental impact and educate consumers on living sustainability. The next few pages describe these eco-friendly efforts.

KNOW
THE FACTS

1. PAPER IS A PLANT
Paper is cultivated from trees, grown on tree farms. For every one tree that is harvested from a certified farm, five are planted.

2. PAPER IS INCREASING
Five trees are planted for every one harvested for paper production. This means 1.7 million trees are planted every day!

3. PAPER IS RECYCLABLE
Paperboard is the most easily recycled packaging. All paperboard can be recycled together, as opposed to recycling different grades of plastic or glass.*

4. PAPER IS RESPONSIBLE
Paperboard packaging reduces waste in landfills and toxic materials in the manufacturing process.

5. PAPER IS FUEL
When its recyclability has been exhausted, paper can be used as a fuel source.

Recyclable   VS.   Compostable

Recycling converts manufactured waste into a new use by breaking down the product into raw materials and reusing them to create something new or different. Less energy goes into creating products made from recycled materials rather than new materials being used for the first time.**

Composting turns organic waste into a useful product to help grow plants or act as soil amendments. Since paperboard comes from a natural source, it can be composted back into its most natural state.**

*"Renewable, Recyclable Paperboard." Paperboard Packaging Council, paperbox.org/Our-Industry/Sustainability.
**Whittle, Amy A. "Composting vs. Recycling." Home Guides | SF Gate, homeguides.sfgate.com/composting-vs-recycling-79311.html.

OUR
MATERIALS

We carefully monitor the use of materials at every stage of our manufacturing process. From concept to finished goods, we create products based on the needs of your item, while keeping in mind the environmental effects of our processes and materials. We provide The Complete Package™ for you.

INKS
vegetable and water-based inks and coatings

FUEL
lightweight paperboard that reduces fuel usage for transportation

VOC's
inks with low levels of volatile organic compounds

WASTE
recycled paper-board with up to 35% post-consumer waste

BOARD
white and kraft paperboard made by a chlorine-free bleaching process

COATINGS
clay coatings that provide clean white surfaces without bleach

LOGISTICS
All shipments are planned for maximum efficiency to reduce fuel consumption by our fleet of trucks, which utilize EPA Smart-Way Technology.

ENERGY
Since 2012, our solar panels generate enough energy to power 50 homes annually.
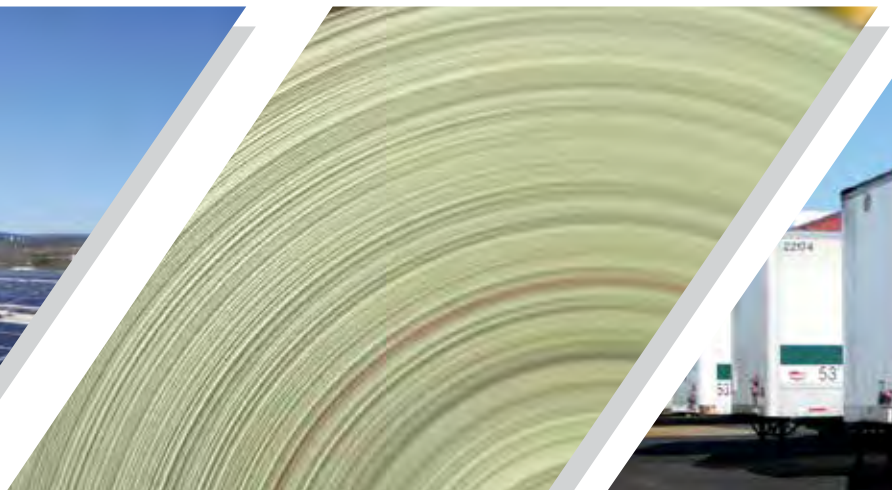

From beginning to end, paperboard packaging is among the most environmentally friendly resources.

Paperboard packaging reduces waste in landfills and toxic materials in the manufacturing process. The trees that are used to make paper are crops, grown in certified tree farms where they are planted, harvested, and replanted for use in packaging, paper, and other disposable products.

- Almost all paperboard comes from certified farms which plant, harvest, and replant trees specifically for the paper industry.
- For every tree harvested from a managed tree farm, five more are planted.
- There are 1.7 million trees planted every day!

stats above from papberbox.org/our-industry/sustainability

OUR
PROCESS

Sheeter
1 — We are certified by SFI, ensuring your substrate is sourced from companies utilizing the most sustainable forestry practices in the industry.

Pre-Press
2 — We design to provide you source reduction through engineered structures to minimize the caliper and amount of material required to produce your product.

Flexo
3 — Printing on our web-fed, flexo press saves energy in more ways than one. It eliminates the need for using the sheeter and uses clean, water-based inks without solvents or UV chemicals.

Offset
4 — Using LED curable inks means we use about 40% less energy for drying, reducing the carbon footprint required for printing.

Digital
5 — The digital print process does not require plates, reducing the energy and waste related to make-ready for each job.*

Cutting
6 — Our cutters send scraps to a diverted board waste stream for increased recyclability. Segregated scraps are bailed and sent off as a fiber source for paperboard production.

Finishing
7 — Our water-based glue acts as an eco-friendly, yet durable, method of sealing any package. The reduced chemicals in our glue help us to minimize our carbon footprint.

*Mansfield plant only

CHATTANOOGA

NEW

BOTH our Chattanooga and Mansfield locations are **BRC CERTIFIED**

BRC PACKAGING CERTIFICATED

The BRC Global Standard for Packaging and Packaging Materials is the first Packaging Standard in the world to be recognized by the Global Food Safety Initiative (GSFI) benchmarking committee. It's why over 3,500 suppliers in over 80 countries have chosen to be certificated to this scheme and is recommended or accepted by specifiers worldwide. The BRC Packaging Standard is used by any manufacturer producing packaging materials for all types of products - from food to consumer products - at all levels: primary, secondary and tertiary.

CTPAT

This agreement with Customs and Border Protections identifies our products as low risk and reduces time to ship internationally.

CEDAR GROVE ACCEPTED

Over 200 of our stock products are Cedar Grove Accepted, meaning they are composed of straight paper or wood fiber, have passed ASTM D6400 or ASTM D6868 standards of biodegradability, or pass a substrate technical review or field disintegration test.

ISO

The International Organization for Standardization certifies that each of our processes, systems, and procedures meet the requirements for standardization and quality assurance.

SUSTAINABLE FORESTRY INITIATIVE

SFI-01442

SFI certifies that we buy wood and paper products from a responsible source, backed by a rigorous, third-party certification audit for chain of custody authenticity.

G7 MASTER

With a G7 Master Printer Certification, we provide consistent color matching with each production run.
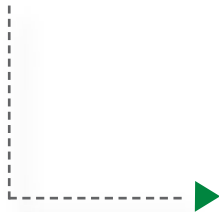

MANSFIELD

QUALITY
PROTECTION
BRANDING...

Paperboard comes in many different board types with various surfaces, characteristics and colors. Use this guide to help determine the best paperboard for your product!

CCK - Clay Coated Kraft
Virgin paperboard that is not bleached. Has one white side, that has been clay coated for durability and printability, and a Kraft brown side. Also known as Coated Unbleached Kraft (CUK).

CRB - Coated Recycle Board
Produced with 100% recycled paperboard. Has one white side, that has been clay coated for durability and printability, and an unbleached side. Also known as Clay Coated Recycle Board (CCRB).

Kraft
Made from virgin, unbleached paperboard. Brown on both sides.

SBS - Solid Bleached Sulfate
Premium paperboard produced with virgin bleached wood pulp.
White on both sides. Typically clay-coated for added durability and printability.

URB - Uncoated Recycle Board
Uncoated board made from recycled paper, usually brown in color. Generally contains post consumer waste. Also known as Bending Chipboard (BC).

*Most paperboard contains some recycled content.
