CUSTOM STRUCTURES

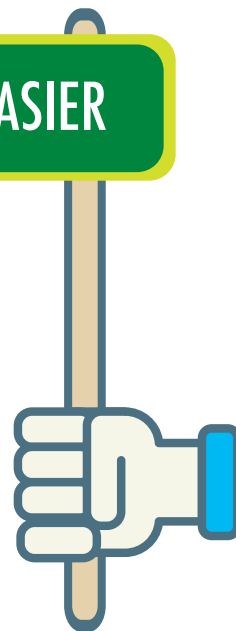

DISTINGUISHING YOUR BRAND HAS NEVER BEEN EASIER

DO YOU WANT YOUR VERY OWN CUSTOM STRUCTURE? WE CAN MAKE THAT HAPPEN!

Our talented structural design team can create the custom structure you need!

The right packaging speaks volumes. What does yours say? From concept to finished product, we will work with you to create impact and help you build your brand.

Custom & Creative: We offer creative designs and in-market testing to ensure your packaging is correct - from its structure, its style, how it relays your brand message and how it supports environmental positioning. Our mission is to do it all with consistent quality and service, utilizing cost-saving strategies to deliver the best value possible.

Printing Excellence: Southern Champion Tray is a certified G7 Master Printer for spot-on color matching when brand colors are paramount. Whether flexography or lithography, we mix inks for both formats in-house, ensuring your color targets.

Solutions Backed by Experience: Over 95 years of experience, combined with a depth of capabilities, award winning design, state-of-the-art printing and production, and industry leading distribution make us the perfect single source for custom solutions. Solutions that work, delivered by a team that works for you!

Design Experts: With software designed specifically for packaging innovation, you get a full-size, physical prototype. Then we'll work with you to incorporate color and graphics and share them virtually through 3D imaging. The results mean faster changes and approvals.

From Start to Finish: Operators monitor the identified needs your custom package commands as it moves through finishing processes in a certified, A+, clean environment.

DIGITAL PRINTING CAPABILITIES: With our HP Indigo 30000 Digital Press, we have digital capabilities that will take your product above and beyond market expectations. Print different artwork on every package, and the 7-color extended gamut print engine can replicate almost every PMS color!

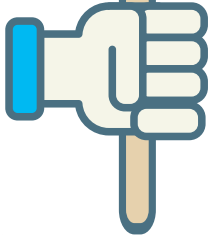

CUSTOM GRAPHICS

... IT'S NEVER BEEN EASIER!

PROMOTE YOUR BUSINESS WITH ATTRACTIVE CUSTOM GRAPHICS.

We offer custom printing on almost all our products. Print your name, logo, design or color on our products to make them your own.

CREATE IMPACTFUL MESSAGES FOR CUSTOMER CONNECTION!

1. Customer Convenience: Offer your customers more convenience. Print a code for customers to download an online ordering app.

2. Interactive: Entertain your customers while they eat. Print a link to an augmented reality app that makes your package "come to life".

3. Cross Promotion: Offset packaging costs by sharing the message with one of your favorite suppliers.

4. Loyalty Programs: Print a code that allows your customers to sign up for rewards, like points towards coupons and discounts.

See our Custom Print Program brochure with details for custom color printing on trays, ChampPaks™, and lock corner bakery boxes, all with LOW MINIMUMS.

Our Green Initiative:

Our products are made from paperboard, which is recyclable. Many of our products are compostable in municipal composting facilities. Our goal is to encourage sustainable outcomes for our products. We are continually working to improve our products' environmental impact and to educate consumers on living sustainability. The next few pages describe these eco-friendly efforts.

KNOW THE FACTS

1. PAPER IS A PLANT

Paper is cultivated from trees, grown on tree farms. For every one tree that is harvested from a certified farm, five are planted.

2. PAPER IS INCREASING

Five trees are planted for every one harvested for paper production. This means 1.7 million trees are planted every day!

3. PAPER IS RECYCLABLE

Paperboard is the most easily recycled packaging. All paperboard can be recycled together, as opposed to recycling different grades of plastic or glass.*

4. PAPER IS RESPONSIBLE

Paperboard packaging reduces waste in landfills and toxic materials in the manufacturing process.

5. PAPER IS FUEL

When its recyclability has been exhausted, paper can be used as a fuel source.

*"Renewable, Recyclable Paperboard." Paperboard Packaging Council, paperbox.org/Our-Industry/Sustainability.

SUSTAINABILITY

Look for our sustainability icons on each product page.

Recyclable

Recycling converts manufactured waste into a new use by breaking down the product into raw materials and reusing them to create something new or different. Less energy goes into creating products made from recycled materials rather than from new materials being used for the first time.**

vs.

Compostable

Composting turns organic waste into a useful product to help grow plants or act as soil amendments. Since paperboard comes from a natural source, it can be composted back into its most natural state.**

**Whittle, Amy A. "Composting vs. Recycling." Home Guides | SF Gate, homeguides.sfgate.com/composting-vs-recycling-79311.html.

OUR MATERIALS

We carefully monitor the use of materials at every stage of our manufacturing process. From concept to finished goods, we create products based on the needs of your item, while keeping in mind the environmental effects of our processes and materials. We provide The Complete Package™ for you.

 <p>INKS vegetable and water-based inks and coatings</p>	<p>FUEL lightweight paperboard that reduces fuel usage for transportation</p> 
 <p>VOCs inks with low levels of volatile organic compounds</p>	<p>WASTE recycled paperboard with up to 35% post-consumer waste</p> 
 <p>BOARD white and kraft paperboard made by a chlorine-free bleaching process</p>	<p>COATINGS clay coatings that provide clean white surfaces without bleach</p> 
 <p>LOGISTICS All shipments are planned for maximum efficiency to reduce fuel consumption by our fleet of trucks, which utilize EPA Smart-Way Technology.</p>	<p>ENERGY Since 2012, our solar panels generate enough energy to power 50 homes annually.</p> 

From beginning to end, paperboard packaging is among the most environmentally friendly resources.

Paperboard packaging reduces waste in landfills and toxic materials in the manufacturing process. The trees that are used to make paper are crops, grown in certified tree farms where they are planted, harvested, and replanted for use in packaging, paper, and other disposable products.

- Almost all paperboard comes from certified farms which plant, harvest, and replant trees specifically for the paper industry.
- For every tree harvested from a managed tree farm, five more are planted.
- There are 1.7 million trees planted every day!

OUR PROCESS

*Mansfield plant only

CHATTANOOGA

The BRCGS for Packaging and Packaging Materials is the first Packaging Standard in the world to be recognized by the Global Food Safety Initiative (GFSI) benchmarking committee. It's why over 3,500 suppliers in over 80 countries have chosen to be certificated to this scheme and is recommended or accepted by specifiers worldwide. The BRC Packaging Standard is used by any manufacturer producing packaging materials for all types of products - from food to consumer products - at all levels: primary, secondary and tertiary.

This agreement with Customs and Border Protections identifies our products as low risk and reduces time to ship internationally.

Over 200 of our stock products are Cedar Grove Accepted, meaning they are composed of straight paper or wood fiber, have passed ASTM D6400 or ASTM D6868 standards of biodegradability, or pass a substrate technical review or field disintegration test.

The International Organization for Standardization certifies that each of our processes, systems, and procedures meet the requirements for standardization and quality assurance.

SFI certifies that we buy paper products from a responsible source, backed by a rigorous, third-party certification audit for SFI® certified sourcing authenticity.

With a G7 Master Printer Certification, we provide consistent color matching with each production run.

MANSFIELD

QUALITY, PROTECTION, BRANDING...

Paperboard comes in many different board types with various surfaces, characteristics, and colors. Use this guide to help determine the best paperboard for your product!

CCK - Clay Coated Kraft

Virgin paperboard that is not bleached. Has one white side that has been clay coated for durability and printability, and a Kraft brown side. Also known as Coated Unbleached Kraft (CUK).

CRB - Coated Recycle Board

Produced with 100% recycled paperboard. Has one white side that has been clay coated for durability and printability, and an unbleached side. Also known as Clay Coated Recycle Board (CCRB).

Kraft

Made from virgin, unbleached paperboard. Brown on both sides.

SBS - Solid Bleached Sulfate

Premium paperboard produced with virgin bleached wood pulp. White on both sides. Typically clay-coated for added durability and printability.

URB - Uncoated Recycle Board

Uncoated board made from recycled paper, usually brown in color. Generally contains post consumer waste. Also known as Bending Chipboard (BC).
