BORMIOLI ROCCO

Bormioli Rocco's first glassware factory dates back to 1825, but historians say the origins of Bormioli Rocco glass can be traced to the Middle Ages.

With stemware, tumblers, beer glasses and iconic food storage jars gracing tables around the world, quality is the cornerstone in the foundation supporting the Bormioli Rocco brand. The manufacturing facilities utilize state of the art technology and economically source only the best raw materials. From the finest sand imported from Germany to organic glazes used to color glass, all are brought together in products influenced by exhaustive design research.

Thanks to continuing investment in technology, research and design, Bormioli Rocco has become one of the leading glass manufacturers in the world.

STEELITE

Fine food demands the finest presentation.
As a premier manufacturer and supplier of tabletop concepts, we offer a wealth of experience and an appetite for customer satisfaction.

Established in 1983, Steelite International celebrates over 30 years of innovative design and superior service. Steelite's core chinaware products are manufactured in Stoke-on-Trent, England, at one of the most modern and efficient tableware production facilities in the world. An international leader in design and quality, Steelite also proudly distributes unique and innovative products through strategic partnerships with like-minded manufacturers. Steelite International values Bormioli Rocco as part of this elite group.

With new targets set through the Green Initiative to cut waste of raw materials, energy and water, Steelite International is determined to reduce the company's carbon footprint and impact on the environment. Steelite has been ISO 14001: 2004 Environmental Management Standard (EMS) certified since the certificate's introduction in 1996. Steelite International - inspirational design, excellent quality and outstanding service.

Elevate

glassmaking to
an art form

Raw materials and cutting-edge technology

EXCLUSIVE XLT TREATMENT

Bormioli Rocco's Xtra Lasting Treatment (XLT) is added to protect and strengthen the stem, the part of the glass most prone to breakage from frequent washing, twisting, and polishing. The treatment is applied when the temperature of the glass is still hot, forming an invisible protective layer on the glass surface that will not wear off over time. This protective layer prevents tiny factures and scratches (the main culprits of breakage in the hospitality industry) from forming on the stem, making the stemware extremely durable without compromising its aesthetic quality.

EXCLUSIVE STAR GLASS

Star Glass is a new chemical composition that creates glass of unrivaled purity and transparency, yet eco-friendly because it's completely lead free. Thanks to the total absence of color shading and impurities, Star Glass achieves a level of neutrality that brings style and elegance to the table and allows the color of wines to be perceived without distortion.

LASER CUTTING

The special cutting process and rim finish ensure the products have particularly even, linear and fine edges which enhance perceived quality and accentuated taste.

PULLED STEM

During this manufacturing process, the stem is pulled from the bowl making one unified piece that guarantees an absence of micro-fissure for increased durability. Harmonious and slender contours add aesthetic appeal as well as high resistance and flexibility

TEMPERED GLASS

For more than 30 years, Bormioli Rocco has created and produced a wide range of tempered glass products characterized by unsurpassed strength and functionality–high quality products for the most demanding consumers and foodservice professionals. The tempering process, which consists of subjecting glass to thermal shock as the product is rapidly cooled from 600°C, creates glass 2-3 times more resistant to thermal and mechanical shock than non-tempered glass.

No Sunlight Necessary; These Trends Just Keep On Growing

What had once started as a 'trend' has turned into much, much more. Farm to Table has completely transformed the foodservice industry and opened the window for countless opportunities; 'garden to glass' is a perfect testimonial of that. Organic, fresh, raw, natural; it's what you see on menus and what you hear lingering from your server's lips. Herbs have become the staple ingredient for most cocktails and salads are suddenly being served to-go in fido jars. The times are changing and we aren't the least bit disappointed in the direction they're moving.

Raise The Bar With DIY Creations

Let your customers unleash their inner mixologist by providing them with the template to create their very own masterpiece. Give them the opportunity to mix, stir and shake their drinks, as strong or sweet as they'd like. Self-serve cocktail stations are one of the hottest trends in the industry, appearing in restaurants all over the world. And although 'bloody mary bars' are the most notorious, the possibilities for these 'do it yourself' concoctions are endless!

Try a Mimosa Bar, Prosecco Bar or Martini Bar

Have a designated self-serve station or bring the ingredients tableside. This is one red-hot trend that we don't see fading away anytime soon.

Give Your Tabletop The Extra Edge

Retro, vintage - however you want to spin it, it's back and bigger than ever. What was old is suddenly new again and colored glass has been a perfect testimonial of this comeback. Mixing and matching different shapes, sizes, embossments and colors has created an eye catching presentation in some of the hottest restaurants.

From Tabletop to Hotel Amenities, Colored Glass Makes a Statement

Colored glass is just another example of how impactful the presence of generations before can be. Say goodbye to modern style, the retro trend is here to stay.

Create A Custom Experience

Branding your company's logo right onto your glassware for constant exposure, indicating the necessary pour line for your server's reference; what may have started as a vision can now become a reality with Steelite's 'laser-true' technology. These etching capabilities give you the opportunity to create a unique addition to your tabletop.

A Cost Efficient Solution

Not only will you create a customized experience for your guests, but rather a cost-efficient solution for your business. Etched pour lines provide your staff with the necessary knowledge to know when to stop pouring; ultimately saving you money.
An overall win, win!

NEW

inAlto Collection

The Elegance you Want, the Durability you Need.

"In alto i calici" is the traditional Italian phrase meaning to "Raise your glasses" before a toast. The inAlto collection is our toast to fine Italian design and was created with the restaurateur in mind; providing the elegance you want, and the durability you need. The distinctive angles and tall, thin stem beautifully enhance a table setting. The brilliancy of Star Glass provides the guest with an exceptional wine tasting experience, while the durability of the XLT strengthened stem maximizes operator value. InAlto exemplifies the passion of Italian design, grace and quality.

Star Glass

Bormioli Rocco's exclusive composition of crystal glass provides a brilliancy that allows your patron to view the wine's color and clarity without distortion.
*Star Glass is ISO IWA 8:2009 certified for non-colored, ultra-clear glass.

Laser Cut Rims

Laser cut rims are thin and precise, elevating your patron's perception of the wine.

Balanced Distribution

Balanced distribution of glass at the point where the stem is pulled from the bowl, resulting in a light and well balanced glass.

Xtra Lasting Treatment

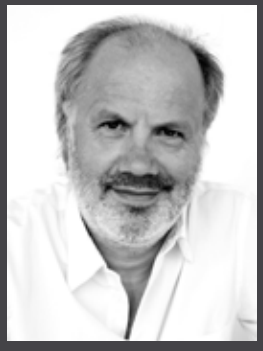

An exclusive treatment added to the stem resulting in increased resistance to breakage due to the rigorous demands of the food service industry. XLT is added when the glass is hot to ensure it will not wash off over time.

Pulled Stem

Pulled stem creates tall and elegant stems, while increasing durability by eliminating the seam found in adjoined stems.

Maximum Stability

Foot is thin and flat, providing maximum stability without being obtrusive.

"The challenge in this project has been creating a new shape, unique and innovative. Together with Bormioli Rocco, we have been able to design a unique glass that embodies Italian tradition, but whose durability exceeds the competition."

ALDO CIBIC & TOMMASO CORÀ
CIBICWORKSHOP, JANUARY, 2014

"Innovative, elegant, lightweight and balanced: these are the qualities that made me choose inAlto as the ideal accompaniment to my dishes, which I like to describe as hearty, never banal, real discoveries for the eyes and the taste buds and protagonists of my instinctive cooking."

LORENZO COGO
JANUARY, 2014

49530514 Swing Bottle (8 1/2 oz)

Care Guidelines

Glassware Care Instructions

- Clean glasses in a glasswasher not a dishwasher
- Use properly sized compartment glass racks
- After washing remove basket and leave to cool down and dry
- Never carry glasses in bouquets
- Never use glass in place of ice scoop
- Never use glass to carry or store flatware
- Never let the beer tap come in contact with the glass

Stacking

Though it may be tempting to stack glasses while bussing or during storage, this practice will prove a quick demise to any piece not specifically designed to stack. Stackable glasses are designed to withstand the mechanical stress of such treatment – an unsteady tower of non-stacking glassware will only result in chipping, unsightly friction rings inside the glass and cracking.

Temperature

Forcing a glass through quick and extreme temperature change may result in thermal shock – a condition that inevitably results in cracking. A piping hot glass piece straight from the dishwasher requires a short cooling period before introducing ice. An easy way to avoid this is to always maintain a suitable level of stock.

Condition

Always be aware of glass condition. The weakened structure of a cracked or chipped glass poses a hazard to not only those working with the piece, but the customer as well. Dispose of this glassware immediately in order to avoid recirculation.

Racks

Make sure to use appropriately sized racks when washing glasses. Glassware will last longer and maintain better condition when utilizing racks designed to fit the glass.
