

K1

Liquid Presoak

Alkaline-chlorinated liquid presoak and destainer for china and stainless steel. Effective formula removes even stubborn soils from cups and china.

Features & Benefits

- Alkaline-chlorinated liquid presoak for flatware and utensils
- Removes stubborn tannin stains left by coffee and tea
- Effective for the removal of caked-on food
- Highly concentrated formula provides a more economical use

Applications

- For use on stainless steel cutlery, aluminum and china
- Do not use on precious metals

Use Instructions

- Use this product as directed by your Diversey representative.
- This product is designed to be diluted at a rate of 0.2–4 oz. / gal. (1.6–31.2 mL / L), depending on the soil load, and is used to presoak stainless and aluminum flatware and utensils, prior to washing in a dishmachine.
- Do not use this product on silver plated flatware, dishware with gold trim, melamine plastics, copper, or brass.
- Cover or remove all food products from the area prior to using this product.
- Do not allow this product or its solutions to splash onto other surfaces. Dilute this product only with water.
- For Food Plant Use: Avoid contamination of food during use or storage. Cookware or utensils and other equipment and surfaces subject to direct contact with food must be thoroughly rinsed with potable water prior to re-use.

Safe handling

Please make sure your employees read and understand the product label and Safety Data Sheet before using this product. The label contains directions for use; and both the label and SDS contain hazard warnings, precautionary statements and first aid procedures. SDS are available online at www.diversey.com or by calling 888.352.2249. Improper use or dilution may result in damage to surfaces and may result in health and physical hazards that match those of the concentrate.
