

TASKI® swingo® 350 B with Li-Ion

The TASKI® swingo® 350 B with Li-Ion is an ultracompact 15 inch (38 cm) auto scrubber designed with a low machine profile and powered by Li-Ion technology.

Features & Benefits

- The newly redesigned swingo 350 B now features a smaller frame and a more lightweight build for easy transport between sites
- Li-Ion batteries allow opportunistic charging without forcing the operator to wait until battery fully loads
- This machine can also accommodate gel or XFC batteries to adjust to the operator's needs
- The new Li-Ion batteries increase battery autonomy significantly more than 1 hour and leads to more flexible use of the machine
- Charging the battery is much faster than with common gel batteries; the Li-Ion battery in a swingo 350 is fully charged after only 2.5 hours
- Li-Ion batteries are significantly lighter than gel batteries which result in a lightweight, easy to carry machine
- Li-Ion batteries ensure a longer lifetime with more than 1000 cycles and the resistance to opportunistic charging improves operational efficiency

Applications

- Perfectly designed for cleaning in confined areas
- Opportunistic charging allows the machine to be used anytime, even if the batteries are not fully charged including daytime operations with high traffic areas
- Ideal for difficult flooring that often poses a problem for more conventional cleaning methods

TASKI® swingo® 350 B with Li-Ion

Description of Features

- **Brush and Squeegee Unit:** Brush and squeegee can be easily removed for cleaning; Squeegee blade can be changed without the use of tools.
- **BMS: Battery Management System:** The battery charger, which is integrated in the machine, prevents deep discharging of the battery and monitors the charging process.
- **Water Regulation:** Water flow can be individually regulated via the controls, according to degree and type of soiling.
- **Handle:** The handle is ergonomically shaped and height adjustable which allows comfortable use of the machine.

Technical data

Theoretical Performance	12,270 ft. ² (1140 m ²)	Battery Capacity / Autonomy	29 Ah / > 1 hr.
Working Width	15 in. (38 cm)	Machine Weight (ready for use)	110 lb. (50 kg)
Squeegee Width	22 in. (55 cm)	Dimensions (L x W x H)	31 x 18 x 17 in. (79 x 45 x 43 cm)
Solution Tank/Recovery Tank	3 gal. (10 l) / 3 gal. (10 l)	Brush Pressure (max.)	24 lb. (11 kg)
Rated Voltage	25.2 V	Sound Level	<70 dB(A)
