Tuxton sustainability

Sustainability Initiatives

Tuxton China Inc. has long identified sustainability as one of the company's top priorities. Our sustainability vision involves being an active part of the solution to restore the global ecosystem and reduce Tuxton's impact on the local environment.

Energy Awareness & Energy-Saving Technology

Tuxton's goal is to reduce overall energy use through operational changes, such as participating in Southern California Edison's Demand Response Program by reducing electricity usage during periods of peak demand. Another way that Tuxton reduces the amount of energy usage is by utilizing the latest energy-saving solutions on company desktops, laptops, and office equipment. Older and less efficient computers are replaced with newer, more energy-efficient units.

Alternative Energy & Paperless Initiative

The solar array on the rooftop of our corporate headquarters in Walnut, CA is connected directly to the facility's internal electric system. This is another major step forward in integrating our sustainability initiatives, focusing on reducing our carbon footprint and investing in the future of our company. And as far back as 2002, Tuxton implemented a print-less initiative to reduce printing.

Production

One of our corporate objectives is to deliver high-quality products that are manufactured with efficient energy usage, controlled emissions, and minimal waste. One of the sustainability initiatives is to eliminate waste in the production process, which is made possible by recycling discarded materials while making sure the products meet our stringent technical criteria.

- 3R Program: Reduce, Recycle & Reuse
- Natural Ventilation and Daylight System
- Water Recycling System
- Dust Treatment System
- Recycling of Discarded Ceramic, Clay and Plaster
- Capture of Kiln's Residual Heat
- Energy Source: Natural Gas
- Green Space

studiotux

STUDIO Tux[®]

What is StudioTux?

Think of StudioTux as your personal workshop and a way to set you apart from your competition. Tuxton has always provided the capabilities to apply custom logos and graphics to a majority of our products. We have also made it possible for customers to mix and match different colors from our existing glazes to virtually any Tuxton stock items. StudioTux further expands the design possibilities beyond these limitations by letting our customers custom tailor their own unique ceramic designs and explore color glazes beyond our current color palettes.

How does it work?

Tuxton will provide an initial quote based on custom design and graphic specifications from the customer. Pricing for custom items will depend on the design and colors. A 3D rendering will be generated, which will allow us the ability to make quick alterations if necessary. A production sample will then be submitted to the customer for final approval in approximately 3-4 weeks. Lead time will be approximately 90 days from the time we receive the confirmed purchase order.

Requirements:

- 12 dozen minimum per item
- Art work must be 1:1 scale at 300dpi or higher in resolution
- PMS numbers
- Trademark authorization
- Placement of logo/design

All custom orders are subject to a 10% overage or shortage of ordered quantity. A 50% deposit is required when placing the purchase order, and/or a purchase agreement must be signed. There are no exchanges or returns on custom items.

For more information regarding custom designs, please feel free to contact your local representative or contact us directly at 877-288-9866. We look forward to making your vision a reality!

TuxCare™

Healthcare operations rely on purposeful practicality as well as aesthetically pleasing designs in every aspect of foodservice delivery. TuxCare is directly influenced by this need and is designed for institutional functionality. It is adaptable for use with insulated domes, bases, and various food delivery systems for optimum heat retention. Our TuxCare products make all types of healthcare foodservice facilities simpler and more efficient.

Red Plate Study: The Cronin-Golomb research team at Boston University found that Alzheimer and advanced Dementia patients increased their food intake by 25% and liquid intake by 75% with the use of brightly colored tableware. In particular, the red color stimulated appetite and the contrast made the food more visible.
