Our mission is to be the industry leader in producing disposable apparel and gloves, providing services and solutions to transform the way distributors maintain and grow their business. We are committed to establishing partnerships and encouraging continual improvement in the workplace with integrity.

Michelle Liu

WellCare International, Inc.

History

Our disposable apparel factory is located in Xiantao city, Hubei province, the largest non-woven products cluster in the world. We have been in the disposable apparel field for more than 15 years with the production of raw materials to the finished products.

Our disposable gloves factory is located in Qingdao city, Shandong province, which is one of the largest disposable gloves manufacturer in the world, with the production of more than 1000 container every year.

In order to better service our overseas customers, we established an office in NY in 2015 and now we have office and warehouse in NJ. Also, we are planning to establish a branch in CA at the end of this year.

Values

Honor - Honoring our clients and workers and understanding we all have the same interests.

Accountability - Responsibility of our actions that influence the lives of our customers and fellow workers.

Integrity - Always acting with honesty and integrity without compromising the truth.

Service Excellence - Giving the best service to customers and achieving excellence each passing day.

Advantages

1. We have our own factories in China, which can produce high quality products with competitive price.
2. We can provide small-batch customization service and help our customers build their own brand.
3. We have our own office in America, which can help our customers directly import products from overseas.
4. We have rich sources in Asia, which can help our customers do business searching.
5. We have warehouse in America, which can provide storage and timely replenishment service.

Disposable Gloves

Disposable Polyethylene gloves

Disposable polyethylene gloves are best when you need to change gloves often while performing tasks that do not require high levels of dexterity. Economical poly gloves work well for tasks like sandwich making, pre-portioning meats and cheeses and when helping customers at the service counter.

Attributes include:

- Easy on and off
- great for single use
- most economic option
- Non-medical use

Disposable Latex Glove

Disposable Latex Glove is Ideal for food service use. Also used for housekeeping, industrial cleaning, and assembly areas They provide a snug, comfortable fit, improving dexterity and touch sensitivity Recommended for delicate work, such as slicing or chopping.

Attributes include:

- great for single use
- Available in Powder-Free or lightly powdered
- Non-medical use

Disposable Vinyl Glove

Disposable vinyl glove is exclusively manufactured to strict quality, performance and sanitary standards. Good for foodservice, food processing and other applications requiring uncompromised safety and cleanliness.

Attributes include:

- DOP/DEHP-free — made from 100% virgin
- great for single use
- Available powdered or powder free
- Non-medical use

Colored Disposable Vinyl Glove

Colored disposable vinyl glove is soft, form-fitting and provide excellent barrier, integrity to keep foods clean and safe.

Attributes include:

- DOP/DEHP-free—made from 100% virgin
- great for single use
- Available powdered or powder free
- Non-medical use

Disposable Nitrile Glove

Disposable nitrile glove is more durable and provide extra-tough protection. Excellent alternative for individuals who experience allergic reactions to latex. Application: Industrial, Automotive, Chemical, Foodservice. Component materials comply with all federal regulations for food contact

Attributes include:

- great for single use
- Available in Powder-Free
- Palm Textured/Micro-roughened
- Non-medical use

Materials

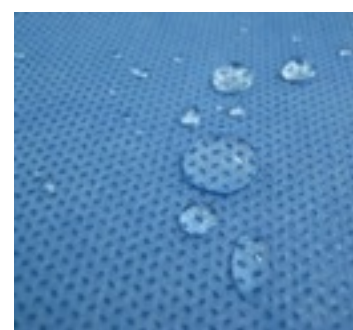

We mainly use four kinds of fabric: Polypropylene (PP) fabric, Microporous fabric, Polypropylene + Polyethylene (PP+PE) Laminated non-woven fabric and SMS non-woven fabric. Now we have two Polypropylene non-woven fabric lines and two Microporous fabric lines in our factory.

Polypropylene non-woven fabric is a light weight, breathable fabric that provides economical protection against non-hazardous, grimy-work environment applications. It is the best low cost solution for protecting workers against dry particulates, dirt and grime.

(PP+PE) Laminated non-woven fabric is a lightweight, spun bonded polypropylene fabric with a polyethylene coating. It can protect workers against certain chemicals, particulates, lead, asbestos, certain sprays and splatters in non-hazardous environment applications.

Microporous fabric is Considered to be a great alternative to Tyvek. It's a PP material laminated with polyethylene. It is lightweight and highly resistant to tears and punctures, which can offer the ultimate level of durability, Impervious, and extremely clean for the most critical environments.

SMS non woven fabric is made from Polypropylene with tri-layer, spun-bond +meltblown+spunbond. SMS non-woven fabric own many special features, such as Medical Repellence (anti-alcohol, anti-blood, anti-oil) grade, anti-static, anti-mildew and anti-bacterial, extra-soft, Hydrophilic, etc.
